

What do we do?

Design, develop, and deploy high-traffic web applications:

- ▶ **Web based applications:** Automate business to increase profitability.
- ▶ **B2B/B2C e-Commerce:** Buy/Sell without geographical, physical, or time restrictions.
- ▶ **Corporate Portals:** Enhance people collaboration thru virtual teams.
- ▶ **Wireless and Mobile Integration:** Plug in "disconnected" users into your e-Business.
- ▶ **Enterprise Application Integration:** With legacy, ERP, or other systems.

We are Technology Experts

- ▶ **Object oriented design:** UML, Rational Rose, Use Case Analysis, Object Modeling, Sequence, Activity, and State diagrams.
- ▶ **Microsoft technologies:** C++, VB, COM, MTS, ASP, ADO, MSMQ, XML, SOAP, and Windows DNA and .NET.
- ▶ **Java technologies:** J2EE, EJB, JMS, Servlets, JSP, XML, JDBC, BEA WebLogic, IBM WebSphere, or iPlanet App Servers
- ▶ **Databases:** Oracle 8i, SQL Server 7.0, Informix, and Sybase.
- ▶ **Wireless and Mobile:** WAP, J2ME, Windows CE, Microsoft Mobile Explorer, PalmOS.

Some Success Stories

Here is peek into a few of the many high-traffic web-based systems we have done:

- ▶ **Providian Financial:** Payment Mgmt System
- ▶ **CSC:** Marketplace for Advertising Media
- ▶ **Allparking:** Marketplace for Automobile Parking
- ▶ **Intuit:** Payroll Mgmt System
- ▶ **Telocity:** Customer Mgmt System
- ▶ **Entropia:** Highly Distributed Computing Platform

Why Choose Diyatech?

We are experts in what we do. Here's how we can help:

- ▶ **e-Strategy:** We analyze your business requirements, evaluate and select appropriate technologies and tools, and prepare a long-term strategy and system architecture for your group, division, or company.
- ▶ **Application Architecture:** We have very senior architects who come in and provide you Architectural Design guidance. This guidance is invaluable for a company and every project should go through this to ensure that it will not become outdated within a year and that it will fit well into your Enterprise.
- ▶ **Powerful Development Methodology:** We have a proven and powerful development methodology that helps us provide solutions in record times. With us, even a challenging project usually takes 3-4 months in which we get a lot done. Try us and you'll be convinced within 2-3 weeks how rapidly we can turn-around with results.
- ▶ **Transfer of Knowledge/Expertise:** No amount of training (without a real-life project involvement) can prepare your engineers to develop your mission-critical business systems. To meet this challenge, we have evolved a Development Partnership Methodology where we can fully engage your engineers in the project and also provide our rapid development services to meet your aggressive deadlines. The end result for you is well-trained workforce and your projects finished on time and within budgets.
- ▶ **FIXED COST; Pay on Results:** Cut down your cost and risks greatly. Lower your cost due to our offshore development cost-savings without compromising on quality and ONSITE presence.
